

Growing Giant Pumpkins, are you going BUGGY?

Giant Pumpkin Guidelines & Growing Tips from Damariscotta Pumpkinfest
Now is the time to water, water, water! Your pumpkin is large, thirsty and needs extra TLC in the form of daily watering, as it grows into the masterpiece it was destined to become.

If you are having trouble with pests and disease, try using a malice

granular (like Merit) and/or a spray-product like Talstar to control the squash vine borer. Alternate with two different pesticides to prevent and control powdery mildew. Spray in the cool of the morning so you don't burn the foliage.
